North Carolina Rallroads, etc. A friend has called our attention to an erroneous statement going the rounds of the papers, in which the miles of Railroad in operation in North Carolina are put down at 280, instead of at least 400. The Wilmington & Raleigh, 162 miles, the Raleigh & Gaston 84 miles, and the portion of the Wilmington & Manchester, lying within the State, over 60 miles -being, of themselves, over 300 miles in operation. Besides these, there are the roads connecting Gaston with Weldon, and with the junction on the Petersburg Road-amounting to about 30 miles-and the portions of the Portsmouth & Roanoke, the Petersburg & Roanoke, and the Charlotte & South Carolina, which are within our borders, fully bringing up the miles of road in operation within our State to the figure we have named. The number of dron had been ordered to the Baltic. miles in course of construction, or proposed to be made, also exceed the 500 miles given .- 220 miles of the Central far advanced to completion, and of which, between fifty and sixty will be finished by April next-the laying of the iron having been comwhich were authorized by the last Legislature, which will considerably exceed three hundred miles; and the Fayetteville and Western Railroad-for which the stock is all taken-and which, with its branches or extensions, will certainly go over 50 milesmaking, in all, much nearer 700 than 500 miles.

When these facts are taken in consideration with the large amount of plank roads made and being and specie. made, it will be seen that North Carolina is far from being so backward in the race of improvement as is generally supposed. The single town of Fayetteville has more miles of plank road connecting with her than almost any other State in the Union can

The Difference. The recent Whig State Convention of Alabama dopted the following resolution Resolved, That we will oppose, to the utmost of our ability, the annexation of additional territory to the United States, unless the equal rights of the South in such territory

shall be expressly guarantied by the articles of cession. While this is the southern whig doctrine, remarks the Cincinnati Enquirer, that of the same party at the north is, no more territory unless it comes into the Union free-an admirable illustration of the entire sectional character of the whig organization, and the tenacity with which each branch of it adheres to the old federal instinct and tradition of opposition to territorial extension. As a contrast to this narrow, illiberal, short-sighted, anti-American policy, we cannot do better than give the resolution on the same subject that was passed at the recent democratic State Convention in Vermont. Here it is: Resolved, That, opposing the narrow and timid policy which, had it prevailed, would have limited the United States of America to the territory of Massachusetts, Connecticut, and the "Providence Plantations," the democratic party has wisely favored the enlargement of the domain of free dom; and that we are in favor of the acquisition of any ter-ritory on this continent, or the islands adjacent thereto, nations and the rights of our own. Remarking upon the state of things presented by

these two resolutions, the Enquirer says that in the Vermont resolution the whole democratic party, North and South, most cordially concur, for it is not only national in its character, but it is in accordance with the true interests of the country, and is the policy which has always governed the administration of the government when it has been in democratic hands, from the time of Jefferson to that of Pierce. We had supposed that the late glorious and happy results to the nation, that had followed the annexation of Texas and the purchase of Califorpia, had dispelled the fears and conquered the prejudices of even the conservative whigs upon this subject, and that they would make no more opposition to territorial extension in future; but we have given them more credit for learning by experience than we fear they deserve, as the probability i. that both northern and southern whiggery would unite in opposing it, though for precisely different reasons.
